JEWELLERY SHOP WEBSITE USING PHP
A MINI-PROJECT REPORT

Submitted by

YOKESH.R   **200701303**

in partial fulfillment of the award of the degree

of

BACHELOR OF ENGINEERING

IN

COMPUTER SCIENCE AND ENGINEERING

BONAFIDE CERTIFICATE

Certified that this project **"JEWELLERY SHOP WEBSITE"** is the bonafide work of **"YOKESH.R (200701303)"** who carried out the project work under my supervision.

Submitted for the Practical Examination held on _____.

INTERNAL EXAMINER   **EXTERNAL EXAMINER**

ABSTRACT

The purpose of College Event Management System is to automate the existing manual system by the help of computerized equipments and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. The required software and hardware are easily available and easy to work with. On college and university campuses, events are happening all the time, whether student- or faculty-focused, and often through in-house or third parties and vendors.

College Event Management System, as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources. The organization can maintain computerized records without redundant entries. That means that one need not be distracted by information that is not relevant, while being able to reach the information

The aim is to automate its existing manual system by the help of computerized equipments and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. Basically the project describes how to manage for good performance and better services for the clients. The registered details of the event are shown clearly which makes it easier to modify the entered details.

ACKNOWLEDGEMENT

We thank the almighty God for the successful completion of the project. We would like to extend our sincere thanks to our Chairman, **Mr. S. MEGANATHAN, B.E, F.I.E,** for his sincere endeavor in educating us in his premier institution.

We express our gratitude to our beloved and respected Chairperson, **Dr. (Mrs.) THANGAM MEGANATHAN, M.A., M.Phil., Ph.D.,** and our Vice-Chairman **Mr.M. ABHAY SHANKAR, B.E., M.S,** for their enthusiastic motivation which inspired us a lot towards completing this project.

Our sincere thanks to **Dr. S.N. MURUGESAN, M.E., Ph.D.,** our beloved Principal for his kind support and facilities provided to complete our work in time.

We thank our Head of the Department, **Dr. P. KUMAR, M.E., Ph.D.,** for his invaluable guidance and encouragement for the successful completion of this project.

We convey our sincere and deepest gratitude to our internal guide, **Mr.M.JAGADEESH M.Tech., Ph.D.,** for his valuable guidance, ideas and advice throughout the course of the project.

Finally, we express our gratitude to our parents and friends for extending their full support.

TABLE OF CONTENTS

1.INTRODUCTION

Online Jewellery Shop is basically used to build an application program which help people to find and buy latest design of ***jewellery*** with different categories like Gold Silver, Diamond . It is useful in the way that it makes an easier way to buy products online.Today most of the ***jewellery shop*** is useful for shopping site. The admin have lots of paper work and they are using desktop, spread sheet like MS Excel application to manage data in soft copy about user record. In this proposed ***jewellery System*** it will run in server and user can handle whole the registration activities. It has facilities to generate various types of reports (like pdf, excel) which are required by the management during event organizing.This application maintains the centralized database so that any changes done at a location reflects immediately. This is an online tool so more than one user can login into system and use the tool simultaneously.The aim of this application is to reduce the manual effort needed to manage transactions and historical data used in various gods owns. Also this application provides an interface to users to view the details about events.

1.2 SCOPE OF THE WORK:

The scope of this system is to provide user comfortable environment of Purchasing and selling products and services over the internet without the need of good physically to the market is what online shopping all about. Online shopping is just like are tail store shopping that we do by going to the market, but it is done through the internet.Online shopping has made shopping painless and added more fun.Online stores offer product description, pictures, comparisons, price and much more. and the benefits of online shopping is that by having direct access to consumer,the online stores can offer products that cater to the needs of consumer,cookies can be used for tracking the customer selection over the internet or what is of their interest when they visit the site again. Online shopping makes use of digital technology for managing the flow of information, products,and payment between consumer, site owners and suppliers. Online shopping can be eitherB2B (business to business) or B2C (business to consumer) Shopping cart is one of the important facility provided in online shopping, this lets customer to browse different goods and services and once they select an item to purchase they can place the item in shopping cart, and continue browsing till the final selection have in the database. Limited access is available to the operator. As this is generic software it can be used by a wide variety of outlets (Retailers and Wholesalers) to automate the process of manually maintaining the records related to the subject of maintaining the stock and cash flow.

1.3 PROBLEM STATEMENT

Shopping cart is one of the important facility provided in online shopping, this lets customer to browse different goods and services and once they select an item to purchase they can place the item in shopping cart, and continue browsing till the final selection have in the database. Limited access is available to the operator. As this is generic software it can be used by a wide variety of outlets (Retailers and Wholesalers) to automate the process of manually maintaining the records related to the subject of maintaining the stock and cash flow

1.4 AIM AND OBJECTIVE:

An Online Jewellery Shop The main goal of this project was to create shopping cart, which allows customers to shop and purchase the Jewellery products online.Moreover,the project is also designed in such a way it lets managers manage the products information.Customers can orders products, and they will be contacted to further process the order

2.SYSTEM SPECIFICATIONS

2.1   HARDWARE SPECIFICATIONS:

Processor	:	I3 8th gen (minimum)
Memory Size	:	8 GB (Minimum)
SSD	:	256 GB (Minimum)

2.2   SOFTWARE SPECIFICATIONS:

Operating System	:	WINDOWS 11
Front – End	:	PHP
Back – End	:	MYSQL
Language	:	SQL

3.MODULE DESCRIPTION

HOME:

It displays the jewellery shop website and contains information regarding it .

CART:

It displays the information about what jewellery we have selected in it.

LOGIN:

It contains the information about user details ,account access,etc.,

ADMIN:

Admin has the power to change contents in th website and can view purchase order and details about the user

VIEW PRODUCT:

It contains all the information of the product regarding size,quantity,rate.

SEARCH:

This module is used to enter the event name and display the registered details of the particular event.

VIEW ORDER:

Users can view the order summary of the products what they have purchased.

6.SNAPSHOT

5.CONCLUSION

My project is only a humble venture to satisfy the needs to manage their project work. Several user friendly coding have also adopted. This package shall prove to be a powerful package in satisfying all the requirements of the college. The objective of software planning is to provide a frame work that enables the manger to make reasonable estimates made within a limited time frame at the beginning of the software project and should be updated regularly as the project progresses.At the end it is concluded that we have made effort on following points...A description of the background and context of the project and its relation to work already done in the area.Made statement of the aims and objectives of the project.The description of Purpose, Scope, and applicability.We define the problem on which we are working in the project.

6.FUTURE SCOPE:

In a nutshell, it can be summarized that the future scope of the project circles around maintaining information.We can add printer in future..We can give more advance software for Jewellery shop website including more facilities We will host the platform on online servers to make it accessible worldwide-integrate multiple load balances to distribute the loads of the system Implement the backup mechanism for taking backup of code-base and database on regular basis on different servers.
